2. Choose **Funding Account**.
 - The FI controls funding accounts via account-level entitlements.
3. Select **Template Type**.
 - Business segment and user permissions determine the options that display.
 - Tax payments require details in the addenda record.
 - Child support is for employers to submit withholding for child support
4. For Template Types of Consumer (PPD), Commercial (CCD), or Web-initiated entries (WEB), indicate if the template will be used to make or collect payments.
 - Other Template Types are for make payments only, so this option won't display.

Payment information

This can be changed at the time of payment.

Amount to pay

More on prenotes:

- Prenotes are optional entries if a business wants to “test” that the recipient information is accurate.
- Upon checking that box, a message appears: “You will not be able to schedule payments for this employee until this prenote processes.”
- A mandatory 2 day waiting period is enforced; then the business can initiate ACH payments to that recipient.

Enter information for each participant (in this example, employees). Participants are listed in alphabetical order by default; the business can sort by any column as well.

Recipient information

Complete the template by adding recipient s.

<input type="checkbox"/>	Recipient ▼	ID	Account	Create prenote?	Amount
<input type="checkbox"/>	Jean Grey	7777777	Business Checking 676767		\$155.00
<input type="checkbox"/>	Magneto		Business Checking 121212		\$155.00
<input type="checkbox"/>	Professor X		Business Checking 89998		\$55.00
<input type="checkbox"/>	Wolverine		Business Checking 33333	✓	\$55.00
Template collecting from 4 recipients					Total \$420.00

IMPORTANT: Prenote files are created and sent to the FI when the template is created/approved, not when the template is initiated.

When is approval required?

If there is approver available (i.e. another Business Admin or a user who has ACH Template Approval permission), then the template must be approved. Even if payment approvals are waived via the Approval Threshold, *templates must still be approved.*

If approval is required:

- Template status is Approval Pending.
- Email is routed to all business users who can approve templates.
- See next page for steps to approve.

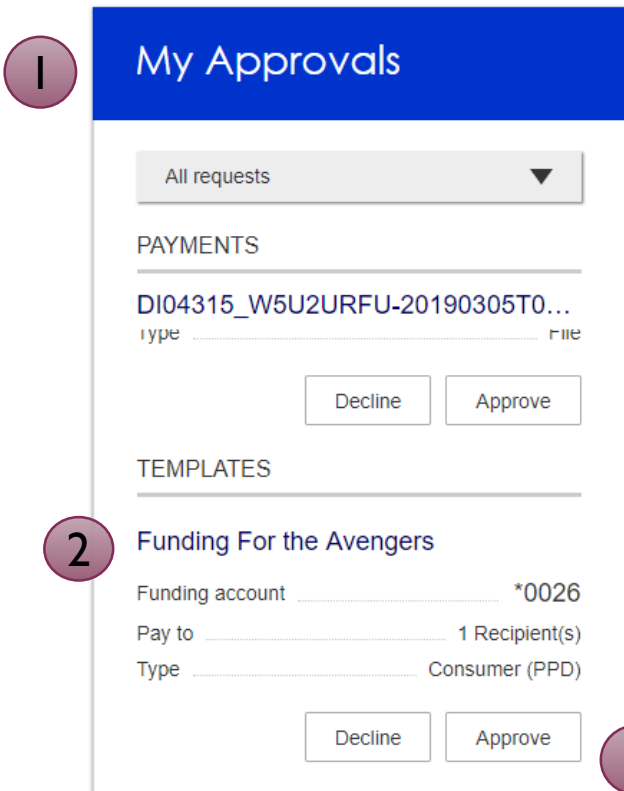

If approval is not required:

- Template status is Approved.
- Template can be used for initiation.

Approve Templates

If approval is required, templates must be approved before they are available for use. Also, if edits are made, the template is unavailable until approved.

1. Go to the My Accounts screen > **My Approvals** widget.
2. Select the **template name** to review details.
3. Select **Approve** for desired template.
4. Select **Confirm** on the pop-up window.
5. The template is now available to use and shows as Approved on the template screen.

Tips:

- The person creating the template will NOT see it in My Approvals since users cannot approve their own work.
- Approving a template does not require additional verification via MFA.
- Decline action moves the template to Needs Attention and sends an email to the person who created the template.
