

The accounts list is the landing screen in Business Mobile. All accounts that show in Business Banking web will show here (based on user entitlements).

1. Each account shows in an “Account Card” account name, number and account balance. Any account nicknames established in BB web will carry over to the mobile app.
2. For businesses with more than one Tax ID, note the dropdown option. Select this to see the list of Tax ID Names and jump to a different one.
3. Select any Account Card to view transaction history. 7 Days of transactions are loaded initially. Scroll down to see 30 days, and keep scrolling to see the next 30, and so on. Business Mobile provides a maximum history of 180 days (ultimately history is controlled by your financial institution and may vary).
